

Table of contents

- [Uncertainty Quantification in Inverse Problems with CUQIpy](#)
- Part I: Foundations of CUQIpy and Bayesian Inverse Problems
 - [Chapter 1: Introduction to uncertainty, priors, and Bayesian inverse problems](#)
 - [1. Errors and uncertainties and why they matter](#)
 - [2. Inverse problems and ill-posed problems](#)
 - [3. Prior information and Bayesian inverse problems](#)
 - [4. Gaussians priors](#)
 - [5. Computational UQ: the need for sampling](#)
 - [Chapter 2: Introduction to CUQIpy](#)
 - [1. Overview of CUQIpy](#)
 - [2. Running the book code examples](#)
 - [Chapter 3: Introduction to Bayesian Inverse Problems \(BIPs\) in CUQIpy](#)
 - [1. Probably the simplest BIP in the world \(the short story\)](#)
 - [2. Probably the simplest BIP in the world \(the long story\)](#)
 - [Chapter 4: Distributions and priors in CUQIpy](#)
 - [1. Introduction to distributions and basic sampling in CUQIpy](#)
 - [2. Distribution gallery](#)
 - [3. Random fields in CUQIpy](#)
 - [5. Implicit priors](#)
 - [6. Prior entropy](#)
 - [Chapter 5: Forward models and the likelihood](#)
 - [1. Forward models in CUQIpy and data generation](#)
 - [2. Forward UQ](#)
 - [3. More forward model examples](#)
 - [Chapter 6: Solving BIPs in CUQIpy](#)
 - [1. Bayesian Inverse Problems in CUQIpy](#)
 - [2. A nonlinear BIP example](#)
 - [Chapter 7: More on CUQIpy technical details](#)
 - [1. Geometry objects: Representation, parametrization, and mapping](#)
- Part II: Inference and Sampling Methods
 - [Chapter 8: Background on sampling methods](#)
 - [1. Sampling with CUQIpy: five little stories](#)
 - [Chapter 9: Hybrid Gibbs sampling in CUQIpy](#)
 - [1. Gibbs sampling for hierarchical Bayesian models](#)
 - [2. Sampling BIP with multiple-input forward models](#)
 - [Chapter 10: Sampling with CUQIpy-PyTorch](#)
 - [1. Hamiltonian Monte Carlo with CUQIpy-PyTorch](#)
 - [Chapter 11: BIPs with implicit prior](#)
 - [1. Regularized linear randomize-then-optimize](#)
 - [2. 1D Poisson problem with TV denoising using MYULA](#)
- Part III: Applications and Research Using CUQIpy
 - [Chapter 12: X-ray Computed Tomography \(CT\)](#)
 - [1. X-ray CT using CUQIpy and CUQIpy-CIL plugin](#)
 - [Chapter 13: PDE-based BIP](#)
 - [1. Solving PDE-based BIP using core CUQIpy](#)
 - [2. PDE-based BIP using CUQIpy and CUQIpy-FEniCS plugin](#)

- [Chapter 14: More applications and benchmarks using CUQIpy](#)
 - [1. User showcase collection](#)
 - [2. CUQIpy benchmarks](#)
- [Chapter 15: Research based on CUQIpy](#)
 - [1. CUQIpy – I. Computational uncertainty quantification for inverse problems in Python](#)
 - [2. CUQIpy – II. Computational uncertainty quantification for PDE-based inverse problems in Python](#)
 - [3. A Computational Framework and Implementation of Implicit Priors in Bayesian Inverse Problems](#)
 - [4. Integration of CUQIpy and UM-Bridge](#)
 - [5. Prior modeling and uncertainty quantification in X-ray computed tomography with application to defect detection in subsea pipes](#)
 - [6. Cochlear aqueduct advection and diffusion inferred from computed tomography imaging with a Bayesian approach](#)
 - [7. Efficient monotonic Gaussian processes via Randomize-then-Optimize](#)
- [Chapter 16: Resources](#)
- [Appendix](#)
 - [A. Falling object problem](#)
